

## **CASE STUDY** (009-M-En) **Municipality, Greece**

### **Containerized Brackish Water Desalination Plant 150 m<sup>3</sup>/day**

**DATE OF IMPLEMENTATION**  
2016

#### **PROJECT**

A Brackish Water Desalination System of 150 m<sup>3</sup>/day was installed in the municipality of Central Greece to provide drinking water to citizens. The system is capable of treating well water with increased content in nitrates.

Since 1980, TEMAK has been at the side of local communities covering their needs with reliability and consistency, having a full range of certified water treatment products.

Thanks to the systems manufacture in Greece and the high expertise of its specialized staff, TEMAK is able to offer total water treatment solutions, from study and design to manufacture and installation of required systems.

The 750.000 m<sup>3</sup>/day of clean potable water or water for general uses, produced daily from TEMAK's installed systems in Greece and 26 abroad countries, constitute the proof of our experience and know-how in water treatment.
