

## **CASE STUDY** (014-C-En) **Hospital, Greece**

### **Hemodialysis System**

**DATE OF IMPLEMENTATION**  
2016

### **PROJECT**

During 2016, TEMAK completed four (4) major projects in two public hospitals and two private clinics in Greece. After careful study, TEMAK Water Treatment Systems were installed, as appropriate, in the existing network, the Central Water supply, the Boiler room or the kidney Dialysis Department.

Since 1980, TEMAK has been at the side of local communities covering their needs with reliability and consistency, having a full range of certified water treatment products.

Thanks to the systems manufacture in Greece and the high expertise of its specialized staff, TEMAK is able to offer total water treatment solutions, from study and design to manufacture and installation of required systems.

The 650.000 m3/day of clean potable water or water for general uses, produced daily from TEMAK's installed systems in Greece and 26 abroad countries, constitute the proof of our experience and know-how in water treatment..
