

## **CASE STUDY** (031-M-E) **Municipality, Greece**

**Upgrade Sea Water Desalination Unit to 700 m<sup>3</sup>/day**

**DATE OF IMPLEMENTATION**  
2017

### **PROJECT**

In this Island, tourism raised during the past three year resulting in the increase of potable water demand. In 2017 TEMAK S.A. offered the ideal solution by supplying and installing a water treatment plant, increasing the production capacity of the existing desalination plant, installed in 2014, from 600 m<sup>3</sup>/ day to 700 m<sup>3</sup> / day.

Since 1980, TEMAK has been at the side of local communities covering their needs with reliability and consistency, having a full range of certified water treatment products.

Thanks to the systems manufacture in Greece and the high expertise of its specialized staff, TEMAK is able to offer total water treatment solutions, from study and design to manufacture and installation of required systems.

The 750.000 m<sup>3</sup>/day of clean potable water or water for general uses, produced daily from TEMAK's installed systems in Greece and 26 abroad countries, constitute the proof of our experience and know-how in water treatment.
